CONTENTS CONTINUED

Fallaw Sowell, Maximum likelihood estimation of stationary univariate fractionally integrated time series models 165

Jiro Hodoshima, Finite-sample properties of single-equation estimators under structural change 189

Søren Johansen and Katarina Juselius, Testing structural hypotheses in a multivariate cointegration analysis of the PPP and the UIP for UK 211

Michael K. Salemi and Jaeyeong Song, Saddlepath solutions for multivariate linear rational expectations models 245

Shigeru Iwata, Highest predictive density estimator in regression models 271

Shigeru Iwata, Instrumental variables estimation in errors-in-variables models when instruments are correlated with errors 297

David N. DeJong, John C. Nankervis, N.E. Savin, and Charles H. Whiteman, The power problems of unit root tests in time series with autoregressive errors 323

Judith A. Giles, Estimation of the error variance after a preliminary-test of homogeneity in a regression model with spherically symmetric disturbances 345

Jerry G. Thursby, A comparison of several exact and approximate tests for structural shift under heteroscedasticity 363

Gordon C.R. Kemp, The potential for efficiency gains in estimation from the use of additional moment restrictions 387
